Profile

Graduated on January of 2020. Passionate about technology. I enjoy and find teamwork neccesary for success, however, I am used to autonomous learning and work. I like learning new technologies if the solution requires it and thinking outside the box. I love traveling, discovering new cultures and photography.

Currently in Belgium, willing to relocate.

Work Experience

Ático   *Full Stack Developer*
Barcelona, Spain. Jan 2022- Present

Ático is a software agency formed by the designer Alexandra Quirós and myself as a full stack developer.

I take care of bringing the custom and incredible designs into code and the deployment and architecture of the sites.

Some of the techologies used are: NextJS, TailwindCSS, Sanity.IO, Prisma, MySQL, PlanetScale, Cloudflare CDN and R2, between others

Clients: Te-cuidamos, Bahadur Project, Verbe Appetit

Capgemini   *Software Engineer Consultant FS*
Brussels, Belgium. Jan 2023 - Present

Worked at the Financial Services department that offers services mostly for banks.Took part in the analysis phase of a migration of 125 java applications from on premises to the cloud using tools like dynatrace or CAST Highlight and a lot of code investigation.

Proposed and led a project regarding the onboarding process of new joiners to the company with React, Typescript, Springboot and MySQL

Clients: Argenta, Capgemini

SII   *Software Engineer Consultant*
Nice, France. Jan 2022 - Jan 2023

Worked in a SAFe organized project. Took part in the maintenance and implementation of new features for big java orchestrator regarding the aviation industry which manages the reservation of offers and orders for different airlines.

Coordination with different teams, worked side by side with business analysts. Self starting and resilient experience, high complexity business logic.

Clients: Amadeus

TBSCG   *Software Engineer Consultant*
Barcelona, Spain. Sep 2018- Dec 2021

Majority of work under the environment of Adobe Experience Manager (AEM) and its customization. Secondary experience with technologies such as Apache Solr, Nginx, Angular JS and MariaDB. Direct contact with clients and all projects where organized in SCRUM.

Experience with the full cycle of different projects, from the analysis, requirement gathering, design and implementation of solutions, as well as release to production. Out of the box thinking process to achieve better solutions for the clients. Also worked in maintenance of already existing projects, developing a lot of debugging skills

Clients: Herbalife, PUIG, IESE Business school, Nikon
